High Single of 125.

C. Leroy Hill put the high single out of reach at the Rose alleys on Thursday in the first string he rolled in the \$5.00. norning, getting 125, and continuing is good work by rolling eight strings or an average of 100. The rivalry at the alleys today will

MAYBE COST NAPS PENNANT. Lucky Double Play by Clymer Hurts Cleveland's Chances.

New Londoners have rolled three more games than the other two teams, so that the loser tonight will be sure to drop behind New London. Whichever wins, two out of three will remain fied with New London. The hour for the match will be as usual at 5.20, to allow the Westerly men to catch their trolley back.

Says: 'I suppose a lar first-class lar sceond beseman and in first-class condition when we played that last series with Cleveland, the Naps might have won the pennant. You know Joe put me on second base at the start of each game. Each inning when we would come in from the bench, Joe would give me a glare and yell "Well, you haven't blown up yet, so you can the condition when we have well as the last series with Cleveland, the Naps might have won the pennant. For the first twelve games rolled in the league, which do not include the games rolled this week. Captain Dalton of New London Team No. 2 has figured out the totals and averages of the six feams which were published in a New time.

Would give me a game a you haven't blown up yet, so you can try it one more inning. But about the sixth or seventh inning each game he took me out, saying: Tm not going to take any more chances on you. You are liable to chuck this game any time.

out the totals and averages of the six teams, which were published in a New London paper. Records of the teams kept by The Bulletin agree in general with Dalton's except that Stope of Norwich No. 1 should have a total of 474 instead of 729 and McClafforty of the same team should have a total of 987 instead of 732, as given these two players by Dalton. Their averages are affected correspondingly.

Eliven of Westerly No. 1 and Captain Harris of Norwich No. 2 hold the two high individual averages, with Bliven a fraction the better, 95 1-2 to 95 1-3. On team average, Norwich No. 2 leads with a mark of 454 1-2, followed by the others in this order: Westerly No. 1, 451 2-3; New London No. 2, 441 1-8; Westerly No. 2, 438 2-4; New London No. 1, 434 1-3; Norwich No. 1, 419 3-4. The details follow: in getting over to second base, so as to try for a double play. But my legs were none too good, so I played close to the sack so I would not have far to go to head Goode off. Had second base been go to haid Goode off, Had second base been my regmar position or had my legs been right, I suppose I would have played where a second baseman gener-ally does. But this time I was only about 15 feet from second and Bradley hit the ball on a line right into my hands. Ordinarily it would have been good for two or three bases and would good for two or three bases and would have cleaned up the bags. As it was, I had a cinch making a double play.

"Cleveland got one run in the next and we got one in the seventh and then Chech blew up in the ninth and we won out easily. But had Bradley's hit ever got away the Naps would not have played the game they did in the ninth and we would have been beaten. They could have afforded to let us have a couple of runs in the ninth and tightened up in time to have beaten us. So you see there sure is such a thing.

New York Dec. 31.—The last day of he year at the stock exchange was a ult one. Business was light and here were few important changes in rices. The strong advance in New ork Central was attributed to belief that E. H. Harriman was to become an active counsellor in its affairs, rufor assigning him to the chairman-nip of the board. A dropping tenden-in some other Harriman properties as attributed at the same time to man's health was not entirely satisfactory. This contradiction seemed to escape notice and offers an example of the mixed irregular character of the small trading. The imminence of a soliday not unusually has the effect of cutting down the volume of business and the close of the year is of especial and the close of the year is of especial effect in prompting a waiting attitude. Isolated advances were a feature of the market, and these occurred for the most part amongst the less conspicuous stocks. Most of them were unex-plained. Some were supposed to be time simply to action by market pools. The custom of carrying the market pools. The custom of carrying the market quotations of securities for December 31st in inventories and balance siects of institutions which carry them as assets offers a motive for securing favorable constitutions. issets offers a motive for search are being arable quotations on that date. Proparation for this year end "window dressing" is an assigned cause of some such operations for several days past. There was a such operations for several days past.
